Men of Oak

Timbers of oak keep the old homestead standing through the years. It pays to use the right stuff.

"Men of oak" are men in rugged health, men whose bodies are made of the soundest materials.

Childhood is the time to lay the foundation for a sturdy constitution that will last for years.

Scott's Emulsion is the right stuff.

Scott's Emulsion stimulates the growing powers of children, helps them build a firm foundation for a sturdy constitution.

NUTS AND TOMATOES.

As a Steady Diet Cured Paralysis and Bright's Disease.

Peter Johnson, of 1012 Washington avenue South, has had nothing to eat but a handful of nuts and a raw tomato a day for nine months.

He is a living example of the so-called fasting fad for foolish persons.

Johnson had partial paralysis of the left side a year ago, he was the victim of Bright's disease, weighed 240 pounds, suffered from asthma, and was informed by his medical advisers that he could not live more than a month or two.

Now Johnson weighs 170 pounds, is harder than nails and free from aches or pains.

Johnson fasted nearly forty days when he began his cure. Then he ate the story:

I ate half a tomato a day for a week, and then increased to a whole tomato. After a while I added a half pound of mixed nuts. Three weeks from the time I began eating, I was told to eat more by doctors, but never to overdo.

I shall never take a chocolate. The tomato and the nuts, with plenty of water keep me in splendid condition. I am as sound as the day I was born. I can do four times the day's work I used to do."

What is Life.

In the last analysis nobody knows, but we do know that it is under strict law. Abuse that law even slightly, and the result is ruin.

Great living means management of the organs resulting in equilibrium, health and vigor. This is the life of the body.

It is admirably suited for farming, but as it is gotten out of hand, five, even ten, it will prove an ornament to a young man without training. Six cents in postage sent to L. J. Irwin, G. P. A. of the popular Henderson Route, at Louisville, Ky., will bring this beautiful picture to your home.

Barred chickens. If you have a barred chicken with some wood ashes and a very little salt kept where the legs can get it, it is one of the best remedies that can be given to keep them in healthy condition. As to the disease of burning the legs, one remedy is to dig a hole in the ground five feet deep, one foot in diameter at the bottom and five feet at the top, using this hole as a charcoal pit. Into this pit place some combustible matter and burn it. This gradually will dry the legs until they are fully cured. If the disease has thoroughly penetrated the legs, one can be cured by using these coals placed over the pit a short time. It is not so difficult to cure as it is to prevent. If there are any very serious cases these should be covered with salt. In the case of ten or twelve hours the legs will be ready for use. This charcoal may be fed alone to hogs or mixed in the following way: Six pounds of coarsely crushed, eight pounds of salt and one pound of wood ashes. The charcoal should be broken up fine and then mixed thoroughly with the other ingredients. One writer adds to this mixture one and one quarter pound of copperas, which he describes as hot water. This mixture may then be fed to hogs at certain intervals, or what is better it may be placed where the hogs may have free access to it at all times.

King Edward is a kind of sportsman's paradise. A gentleman of Gloucester in Fribourg, using the net from a boat near Chevreux the other day, drew out two trout of which one is locally reported to have weighed 20 pounds and the other 19 pounds. His fatal catch, besides these two monsters of the trout kind, weighed 100 pounds.

Mr. W. C. Nones' Advice to Farmers and Country Merchants on Constitutional Amendment

The Executive Committee of the State Commercial Convention, which is advocating the adoption of the amendment to the State constitution permitting cities to fix their own methods of taxation, is sending out the following statement from Mr. W. C. Nones, President of the Kentucky Wagon Manufacturing Company, of this city.

"Farmers and country merchants of Kentucky, don't make the mistake of thinking the adoption of this amendment of the constitution will not benefit you.

If you want existing factories in our towns and cities to grow, so as to give employment to more men; if you want more consumers for your farm products; and more buyers at your counters if you want lower interest rates when you borrow money; if you want to lessen your State and county taxes; in short, if you want as much prosperity throughout the length and breadth of our grand old Commonwealth as prevails in other States, then vote for the amendment, and get your neighbors to vote for it.

The beneficial effects which will follow the adoption of the amendment, so vast that they can hardly be estimated. The evil that will result, if by any chance the amendment should fail of adoption, will be disastrous in the extreme to the best interests of the State."

BattleShip Kentucky in Colors

The Louisville, Henderson & St. Louis Railway has just had completed for distribution a large order of pictures of the BattleShip Kentucky, which is a work of art and should be in every Kentucky home. The picture is reproduced from a very fine, large, copyrighted photograph by Mr. Enrique Mueller, the official photographer for the United States Navy, taken as the ship is leaving New York harbor for a cruise. It is done in colors, the grey tints of the ship's hull and the white of the funnels, the carefully shaded green of the sea, and the carrying at the top of her flagstaff, the stars and stripes in their natural red, white and blue.

It is admirably suited for farming, but as it is gotten out of hand, five, even ten, it will prove an ornament to a young man without training. Six cents in postage sent to L. J. Irwin, G. P. A. of the popular Henderson Route, at Louisville, Ky., will bring this beautiful picture to your home.
